

Supply of service/workshop truck unit mounted on Iveco ML150E24 4x4 chassis – NEW

DIMENSIONS (outside): approx. 6000 x 2500 x 2200 (l x w x h)

The workshop and lubrication equipment platform is made of a subframe with crossmembers and covered by checkered steel plates 3/5 mm thickness.

A rigid steel frame supports the metal top and the drop sides. Drop sides and upper flaps are made of aluminum profiles and are on two sides (one is fixed and the other is foldable), giving accessibility to operate and handle the lubrication equipment and workshop facilities

A Ladder will be installed in the rear part of the vehicle, under platform and between the two main beams of the auxiliary frame, giving accessibility to operate and handle the workshop equipment.

24 V-system:

The 24 V-system is connected to the electrical system of the vehicle.

4 electric ceiling-lamps 20 W with its switch.

2 work lights on upper rear frame with its switch.

220/380 V-system³

1 power pack consisting of a Diesel engine and a 3-phase generator (OPTIONAL) 230/400 V – 50 Hz., 13 kVA,

6 fluorescent tubes 230 V / 40 W

2 double sockets 230 V / 16 A inside the shelter.

- Left wall
2 single sockets 230 V/16 a inside the shelter.
- Front and ceiling
1 single socket 400 V/16 a inside the shelter.
- Rear right side
