

AUTOCAR MAN IRIZAR

Model: i6

14. DRIVER COMPARTMENT:

The driving position is well thought out and neat for maximum ease of eco-driving. As an option, the driver's compartment can be isolated from the interior cabin by a separation system with an access door.

15. - INTERIOR DECORATION:

High-quality ergonomic instrument panel designed in such a way which simplifies the handling and use of the driver.

The interior is decorated with easily washable synthetic materials with the option of different colors.

The carpets of the seats and the curtains have harmonic colors with the interior colors chosen.

16. - ILLUMINATION:

The external illumination is carried out according to European standards in force by incorporating the latest technologies in terms of illumination such as the daytime running lights for better visibility of the vehicle as well as all the external lights are in LED.

Individual reading lights are fitted to each diffuser, with separate lighting spot for the driver and guide.

In addition to the various interior lights (doors, corridor, running boards, etc.), lighting is provided by LEDs along the coach with two different intensities controlled by the driver.

17. - PAINTING AND DECORATION:

The painting process followed at IRIZAR is identical to that used by the parent company with approved products.

The GLASURIT paint used is a German brand which has all the characteristics of resistance to impact, bending, abrasion, weather, fog and humid climate.

The paint system also includes an anti-gravel treatment for the underbody and the wheel arches.

A visualization of the patterns and decoration with the client's logos is done on a computer before apply them according to scale on the coach.
